EDUCATION

- **M.Sc. in Applied Statistics and Analytics** **CGPA: 3.5/4**
NMIMS University, Mumbai. 2022 - 2024
- **B.Sc. Statistics** **CGPA: 8.3**
The D.G Ruparel College of Arts, Science and Commerce 2018 - 2021
- **Senior Secondary** **Percentage: 71.08%**
The D.G Ruparel College of Arts, Science and Commerce 2018

EXPERIENCE

- **Trinity Life Sciences** Jul 2024 - Present
Generative AI Data Scientist
 - **Recognition & Excellence awards:** Recognized with multiple Trinity awards for outstanding ownership & impact on GenAI initiatives
 - **Tech Stack:** Python, Langfuse, Langchain, Milvus DB, Docker, AWS, Git, Postgres, API, Openai & Claude Models.
 - **Title: Agentic GenAI Platform for RAG & SQL based Insights for District Managers.**
 - * Delivered scalable GenAI solutions, including RAG Q&A/summarization and AI Analyst Bot for executives.
 - * Built multi-format parsers with GPT/Claude to convert 300+ documents into a searchable JSON-based knowledge base.
 - * Optimized retrieval accuracy availing Milvus hybrid search, custom embeddings, and prompt engineering.
 - * Engineered Agentic AI framework with multi-LLM clients, Dockerized architecture, and AWS integration
 - * Developed autonomous AI agents for RCA and SQL bot generation across PostgreSQL, improving RCA speed by ~60%.
 - * Making use of Langfuse for debugging and monitoring agent workflows end-to-end AI pipelines spanning 10+ projects.
 - * Dynamic chart rendering module to visualize 14+ chart types with insights; boosted responsiveness via async and parallel processing.
 - * Architected a robust Cube Dev-powered validation layer within the SQL Bot framework, enforcing 100% semantic consistency.
- **RBL Bank** Feb 2024 - May 2024
Data Scientist
 - **Title: Customer Propensity Modeling for Savings Account Retention**
 - * Collected, cleaned, and pre-processed large-scale **savings account customer data** on **Google Cloud Platform (GCP)** through **SQL** and **Python**, ensuring robust and reliable datasets for model development.
 - * Developed and optimized **propensity models** using **Logistic Regression** with over **250+ engineered features**, applying **hyperparameter tuning** to predict the **likelihood of customers becoming inactive or leaving the bank**, achieving **80% accuracy** and **82% recall**.
 - * Automated **model monitoring, performance tracking, and retraining workflows** using **Python**, enabling continuous improvement and operational efficiency for **internal product teams**.

PROJECTS

- **University Attendance System** Jul 2023 - Jan 2024
Dr Leena Kulkarni, Program Chairperson NMIMS. [Project Link](#)
 - Implemented and integrated attendance system utilizing Artificial Intelligence with 96% accuracy exercising Convolutional Neural Network deep learning model trained on real-world data.
 - Scheduled seamless integration with smart boards for automated attendance, slashing the average time from 4.5 mins to nearly zero.
 - This innovation not only addresses proxy attendance but ensures real-time, foolproof tracking of ~60 students classroom, minimizing disruptions in the classroom environment.
- **Machine Learning for Customer Segmentation** Feb 2023 – Apr 2023
Geeta Zankar Market Research Industry Expert. [Project Link](#)
 - Conducted RFM analysis on 500,000 retail orders, segmenting or research on 4000 customers into 3 categories using KMEANS and Hierarchical clustering techniques. Also building KPI.
 - Utilized Natural Language Processing (NLP) for feature extraction/engineering to categorize the products (100+)
 - Employed logistic regression to identify key revenue drivers with an accuracy of 94% and formulated effective strategies to boost business growth and enhance customer experience using machine learning and Marketing

RELEVANT COURSES AND SKILLS

- **Data Science:** Python, Machine Learning, Deep Learning, SQL, Modelling & Hyperparameter Tuning,
- **Generative AI:** GenAI (LLM, RAG Prompt Engineering), Lang-Chain, AWS
- **Courses:** Udemy: Machine Learning and Deep Learning in Python & Verified Skills (Hacker Rank): SQL and Python
- **Soft Skills:** Critical thinking, problem-solving, collaboration, curiosity, domain understanding, data intuition, attention to detail.

Extra-Curricular Activities

- Lead 4-member team to **Top 12/300 & Top 3** in Category Wise at **"DATAHACK" in AI/ML hackathon**. Used NLP for SEO (Search Engine Optimization) using NLTK and text2vec and Web Scraping data from 300+ Wikipedia pages for You tube suggestions.
- Dynamic Portfolio Website: A customizable no-code portfolio leveraging Gemini CLI with modular architecture and zero-cost deployment.
- Ranked 2nd in a 6hour "Classical Survey" contest with a teammate, survey 200 individuals on "Canteen Food" & delivered perceptive conclusions from the findings
